EXPERIENCE

CenCore

Springville, UT

Financial Data Specialist

August 2026 – Present

- Design automated financial workflows using Power BI, Power Automate, Excel, and Office Scripts to reduce manual accounting processes and improve reporting efficiency.
- Developed a monthly invoicing solution that transforms operational data into standardized customer invoices across multiple projects and billing structures.
- Partner with Finance and Accounting stakeholders to gather requirements, improve processes, and translate complex billing and reporting needs into scalable technical solutions.

Digital Experience & Enablement, Utah Valley University

Orem, UT

Business Intelligence Analyst Intern

January 2026 – August 2026

- Developed Power BI dashboards, reports, and visualizations to support operational analysis and data-driven decision making.
- Collected, cleaned, modeled, and analyzed data from multiple sources to identify trends, monitor KPIs, and provide actionable insights.
- Collaborated with university stakeholders to understand reporting needs and translate business questions into effective analytical solutions.

Proofpoint

Draper, UT

IT Intern

June 2024 – December 2025

- Developed Power BI dashboards and analytics projects to improve visibility into operational data and support business decision-making.
- Contributed to an internal AI initiative, developing AI agents and helping departments identify practical ways to integrate AI into their workflows.
- Provided technical support across enterprise systems while communicating solutions clearly to both technical and nontechnical stakeholders.
